MasonBreese
UiPath Introduction

Automation with UiPath?

UiPath is the world-leading automation tool. It is the only 'hyper-automation' platform that combines process mining with Robotic Process Automation (RPA) and a suite of other tools to deliver intelligent process discovery, accelerate RPA implementation and deployment times, whilst improving overall business performance.

RPA is the science of using software to undertake a task programmatically as though a user was in control of the computer. Software robots can use existing software on a computer to complete these tasks just like a human

would, although much faster and with a much lower error rate.

Process mining offers objective, fact-based insights, derived from automated analysis of actual data and procedures. This helps you to audit, analyse, and improve your existing business processes by answering both compliance-related and performance-related questions.

Task mining captures user interaction data, analysing how people are performing their work, identifying how tasks can be improved both manually and through automation.
MB DIGITAL

What can be achieved with UiPath?

As an organisation in any industry, you could benefit from UiPath:

- Generating new revenue streams
- Reducing cost through faster processes – with less or zero human intervention
- Improving the accuracy of compliance risks
- Combining different systems
- Freeing employees from repetitive tasks
- Providing solutions for peak hours

MBDIGITAL

Where can MasonBreese be of help?

If you are struggling with a technology gap or want to drive your digital transformation further, we can support you.

We are happy to provide an on/offsite demonstration of your own selected use case and show where true benefits can be created in a short space of time.

We can help you to understand your processes, determine which are suitable for automation, automate them – and help you to achieve the benefits agreed at the outset.

There is a range of specific topics with automation we can help with:

- Selection of processes for automation
- Tool evaluation
- Prototyping, automation development, testing and implementation
- Multiplication of automation processes

Why UiPath?

Advantages

- Exceptionally short payback period (typically a matter of weeks)

- Free employees' time for more creative/valuable work

- Enhance processes' quality

- Increase processes' efficiency and speed

- Eliminate wasteful processes

- Provide insights to decision makers on resource allocation

Processes

- Onboarding HR

- Invoice process automation

- Data scraping from websites

- Data entry into websites

- Connecting disparate systems within a manual process

- Creating a smooth customer experience

MBDIGITAL

Are there benefits for me and my business **by partnering with MasonBreese?**

Absolutely

We will get the job done, tailored to your specifications.

From small to large scale projects, our MB Digital team will work with you to shape a digital solution that works for you in your organisation.

Innovation is evolving rapidly so we ensure all our digital consultants and project managers are fully accredited to use a number of processes and data automation tools, such as Alteryx and UiPath, whilst embracing all new digital technology.

Additionally

It is about the work that needs to be done in a cost-efficient and professional manner, and our approach is about working with you and your people.

We love to inspire, innovate and develop, whilst sharing our expertise and the innovative ideas that our team produce throughout our projects.

We put a strong focus on collaboration with both you and your people, allowing us to bring your goals into reality in a way that is sensitive to your culture and situation.

MasonBreese Data Analytics can deliver you to a new horizon
